

***STUDIUL GEOLOGIC
AL UNOR MONUMENTE DIN LAPIDARIUM-UL
MUZEULUI DE ISTORIE DIN GALAȚI***

***A GEOLOGICAL STUDY OF SOME MONUMENTS FROM THE
LAPIDARIUM OF THE HISTORY MUSEUM OF GALAȚI***

Albert BALTRES

The author realizes a rigorous geological (petrographic) study upon some epigraphic monuments (four sarcophagi and one votive altar from the Roman period (II-III centuries A.D.). They belong to the cultural patrimony of the museum and are exposed in the permanent exhibition of the institution (in the Lapidarium sector). The study establishes the nature and the origin of the lythical material from which these important historical vestiges were carved.
