PALACE OF JUSTICE FROM GALAȚI***

*Viorica-Steluța PISICĂ*

The author analyses the circumstances and the building stages of an architectural monument from Galați – the Palace of Justice, built between 1912 and 1927.

From an architectonic perspective, the building belongs to the Neo-Romanian style, being the creation of the illustrious Romanian architects Grigore Cerchez and Anton Vârnav.

In 1975, the building became the headquarters of “Dunărea de Jos” University of Galați.
