***THE ROMAN GLASS BEAKERS FROM THE NECROPOLIS FROM  
LUNCA, GALAȚI COUNTY, BELONGING TO SÂNTANA DE  
MUREȘ – CERNJACHOV CULTURE***

*Ion T. DRAGOMIR*

The article deals with three Roman glass beakers discovered in the necropolis from Lunca, describing not only the items themselves, but also the context of their discovery. The tombs where the glass beakers were found are described at large, along with their funerary inventory. Apart from these glass beakers, within the same necropolis, some other glass objects were found: various types of recipients and glass beads.
